

Priya Yadav

LinkedIn: <https://www.linkedin.com/in/priyامل20/>

Github: <https://github.com/priyayadav20>

Email: priyeshy673@gmail.com

Mobile: +91-9956698064

SKILLS

Languages: C++, Python, Java, JavaScript, SQL
Frameworks: HTML and CSS, Tailwind CSS
Databases & Tools: MySQL, GitHub, MLflow, Jupyter Notebook
Backend: Flask, Django, FastAPI
Core CS: Data Structure & Algorithms, OOP, DBMS, Operating Systems
Soft Skills: Leadership, Problem-Solving, Adaptability

PROJECTS

Study Buddy | [GitHub](#)

Feb' 25

- Built Study Buddy, a Django-based web application enabling users to create and join study rooms for collaborative learning.
- Implemented secure user authentication system including login, signup, and session management.
- Developed full CRUD functionality for managing study rooms, messages, and user interactions.
- Integrated SQLite database for efficient data storage, retrieval, and backend operations.

Personal Expense Tracker | [GitHub](#)

Jul' 25

- Implemented budget planning, monthly summaries, and interactive visualizations to help users track overspending and financial habits.
- Designed a clean database structure and integrated real-time charts to provide clear insights into expenses, savings trends, and cash flow.
- Built a Personal Expense Tracker that records, categorizes, and analyzes daily spending using automated data processing and intuitive UI.

Tire Pressure Monitoring System | [GitHub](#)

Apr' 25

- Developed a machine-learning-based Tire Pressure Monitoring System using Isolation Forest and engineered features to detect Tire anomalies like slow leaks, punctures, and over/under-inflation.
- Supervised a complete data pipeline including data simulation, preprocessing, rolling-window features, and real-time inference logic.
- Deployed an interactive Streamlit dashboard to visualize tire health, anomaly scores, and live alerts for real-world monitoring.

TRAINING

Cipher Schools (Edtech Company)- Foundations and Data Structures in CPP

Jul' 25

- Strengthened logical thinking and debugging skills by designing and analyzing CPP programs to solve real-world computational problems.
- Gained in-depth knowledge of data structures including arrays, linked lists, stacks, queues, trees, and graphs with practical implementation in CPP.
- Developed and optimized algorithmic solutions using sorting, searching, and recursion techniques to improve problem-solving and code efficiency.

CERTIFICATES AND CERTIFICATIONS

Gen AI Fundamentals Coursera	Jan' 26
Data Structures and Algorithms Iamneo	Dec' 24
The Bits and Bytes of Computer Networking Google	Sep' 24
Python Industrial Training Code Sprint	Mar' 24

ACHIEVEMENT

- Solved 150+ Questions on Leet Code and achieved 100 days badge on it.

EDUCATION

Lovely Professional University

Bachelor of Technology
Computer Science and Engineering; CGPA: 6.11/10

Phagwara, Punjab
Aug 23 – Present

Little Flower Children School

Intermediate-PCM | Percentage: 64.5

Mau, U.P
Apr 22 – May 23

St. Norbert School

Matriculation | Percentage: 70

Mau, U.P
Apr 20 – May 21
